Overview

Feedback

Are you passionate about building cool devices and technologies? The Surface Team focuses on building devices that empower every person and every organization to achieve more. A fundamental part of our strategy is having desirable and powerful devices that enable the experiences people want, and elicit their excitement. Creating these devices involves a close partnership between hardware and software engineers, designers, and manufacturing. We are currently building the next generation and Surface needs you!

Qualifications

- Minimum BS in Computer/Software Engineering or related field.
- Minimum of 5 years' experience contributing to the embedded firmware development for products in the consumer PC or consumer electronics industry. C lang development experience (Assembly, C++ and other higher level languages as well as host level application programming a plus)
- Proven Embedded FW architecture skills showing a deep understanding of embedded systems, 8-32 bit microprocessors, IO's, I2C/SPI and other interconnect buses
- Strong problem solving and debugging skills for modern-day multiprocessor systems (able to write/debug code, use HW level code debuggers and diagnostics tools) .
- Ability to use hardware debugging tools such as logic analyzers, oscilloscopes, JTAG, Flash emulators, ICE, etc. during the firmware development process.
- Strong communication skills required, including the ability to clearly express technical concepts in verbal and written forms. Able to scale conversations from block diagrams to C/asm level code explanations.
- Must be able to plan work, and work to a plan adapting as necessary in a rapidly evolving environment.
- The ability to comprehend and assimilate technical concepts across multiple disciplines is a plus.
- Enthusiastic, motivated and self-driven.
- Some travel may be necessary.

Responsibilities

Role:

We're looking for talented firmware engineers to deliver great customer experiences . As a firmware engineer you will take customer outcomes to feature definition, platform selection, and code implementation delivering product designs that are optimized for high volume consumer products.

Firmware Engineers work with electrical engineers, system engineers, architects and software engineers to determine the core firmware strategy for our product roadmaps.

Benefits/perks listed below may vary depending on the nature of your employment with Microsoft and the country where you work.

-  Industry leading healthcare
-  Educational resources
-  Discounts on products and services
-  Savings and investments
-  Maternity and paternity leave
-  Generous time away
-  Giving programs
-  Opportunities to network and connect

Microsoft is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to age, ancestry, citizenship, color, family or medical care leave, gender identity or expression, genetic information, immigration status, marital status, medical condition, national origin, physical or mental disability, political affiliation, protected veteran or military status, race, ethnicity, religion, sex (including pregnancy), sexual orientation, or any other characteristic protected by applicable local laws, regulations and ordinances. If you need assistance and/or a reasonable accommodation due to a disability during the application process, read more about [requesting accommodations](#).
